Prime Global Logistics is one of Western Australia's fastest growing global freight forwarders operating within a worldwide network.

Summary

Prime Global Logistics is an Australian owned global logistics company.

No job is too complicated, heavy or oversized. Our team will find a way to move project materials on time and within budget, and provide secure storage options along the way and on site.

Prime Global Logistics' experienced Project Managers work in partnership with our valued client to provide hands-on project solutions.

Prime Global Logistics has specialist experience in providing support to the mining and oil and gas sectors. Drawing on our global supply network, we are able to develop tailored solutions to suit the individual needs of clients based throughout the world.

Prime Global Logistics understands the requirements of the relevant Australian regulatory bodies and their international counterparts.

Description

Prime Global Logistics Pty Ltd (PGL) is a proudly Australian owned global logistics provider for companies requiring logistics services such as project planning, project execution and operational logistics.

We are not ordinary freight forwarders, instead hands-on project managers. We offer a wide range of specialised services within the freight forwarding and bulk chartering market.

PGL is founded on over 20 years of experience and a need in the market for a high-quality logistics and procurement focused company.

PGL services the mining, resource and manufacturing industries. Project logistics is a niche business, each project is unique and nothing should be taken for granted. Effective project management is the key success factor in successful project supply chain management.

Our approach is to take ownership and be accountable. With our strong focus on delivering personalised customer service, we offer a unique and comprehensive range of management solutions that are not readily available in the mainstream project logistics sector. We are highly experienced in managing project supply chains worldwide across both 'developed' markets such as Australia, USA and Europe and 'developing' markets such as China, Indonesia and UAE with particular expertise in mining infrastructure.

Our expertise in integrated logistics management, strong customer service and value-added service focus underpins our success in managing a diverse range of projects from small individual movements through to large, complex and demanding projects for multi-national resource companies. We have an established global partnership in which we have 57 offices in 32 countries.
