With a highly qualified and experienced management team, skilled field personnel and a large range of specialist plant and equipment, Diona has a reputation for high quality work, innovative design solutions and exemplary community relations.

Summary

Whatever the asset - Diona Delivers!

Diona is a multi-utility infrastructure civil engineering company with more than 40 years experience.

Our specialty is technically complex urban projects. We have a proven track record of developing equipment and innovative solutions to meet challenging client requirements.

Our services include all aspects of concrete construction, trenching, boring and drilling, pipeline installation for water, sewer, stormwater, gas and electricity infrastructure.

We are accredited service providers to Ausgrid, Energex, Transgrid, Sydney Water, Brisbane Water, APA, Jemena and Telstra, as well as many other asset owners. We've also worked on many projects for local councils in the greater Brisbane, Adelaide, Melbourne and Sydney regions.

Description

With a highly qualified and experienced management team, skilled field personnel and a large range of specialist plant and equipment, Diona has a reputation for high quality work, innovative design solutions and exemplary community relations.

We have a track record of cost effective design and construction methods to meet challenging client requirements.

We are accredited service providers to DPTI, SA Water, Ausgrid, Energex, Transgrid, Sydney Water, QUU, APA, Jemena and Telstra, as well as many other asset owners. We've also worked on many projects for local councils.

Our Key Utility/Road Clients include:-

NSW: Sydney Water, Ausgrid, Jemena, RMS, Transgrid

VIC: Yarra Valley Water, Western Water, APA, Multinet

SA: SA Water, SA Power Networks, DPTI, APA

QLD: QUU, Energex, APA, Dept. Main Roads

Our services include all aspects of design and construction associated with specialised infrastructure including: high voltage cable (33 kV-330 kV), water pipelines, sewer & pump stations, high pressure gas pipelines, and civil works. Our in-house design team is backed by over 40 years of onsite experience. This means our designs have a high degree of constructability, and works can be completed quickly, cost effectively and with minimal variations.

We are aware of the constraints that exist in completing projects on time and on budget. That is why we are constantly evolving new design techniques and more cost effective technology, resulting in accelerated project completion with less impact on the environment and stakeholders.

Associations

- > Civil Contractors Federation
- > Master Builders Association
- > Australian Society for Trenchless Technologies

Products & Services

- > Pipeline Construction
- > Concrete Construction
- > Thrust Boring and HDD (Horizontal Directional Drilling)
- > Design and Construction
- > Earthworks
- > Testing and Commissioning

Industries Served

- > Clean Energy
- > Construction & Engineering
- > Defence
- > IT & Communications
- > Oil, Gas & Energy
- > Professional Services
- > Rail
- > Steel
- > Transport
- > Water

Accreditations

- > Safety Accreditation - AS/NZS 4801
- > Environmental Accreditation - ISO 14001
- > Quality Accreditation - ISO 9001

Major Clients

- > Previous and Current significant clients:

Previous Significant Projects

2019

**Adelaide CBD Areas G & H
\$4,500,000**

Client: APA Group

Adelaide CBD areas Gas Works

2019

**Install Fire Main and Storm Water - Lowered
Motorway
\$2,500,000**

Client: Gateway South

Install Fire Main and Storm Water - Lowered Motorway

2019

**Transmission Line 39 - Deviation Works - 330
Kv Cable Design & Construction
\$10,000,000**

Client: TransGrid

Electrical work for the Transmission Line 39 - Deviation Works - 330 Kv Cable Design & Construction

2019

**Wastewater Separation Project Strategy -
Woolloomooloo
\$30,000,000**

Client: Sydney Water Corporation

Sewer works for the Wastewater Separation Project Strategy - Woolloomooloo

2018

**SA Water - Barossa Infrastructure Capacity
Increase
\$1,000,000**

Client: Guidera O'Connor

Civil works Infrastructure capacity increase in the Barossa

2019

**APA Gas Mains Renewal Program
\$25,000,000**

Client: APA Group

Renewal of 300kms gas reticulation pipework in South Australia, Victoria and Queensland.

2019

**Multinet Gas Mains Renewal Program
\$30,000,000**

Client: Multinet

Renewal of gas reticulation pipeworks

2019

**Parramatta Light Rail (Stage 1) Enabling Works
\$35,000,000**

Client: Transport for NSW

Civil works for the Parramatta Light Rail (Stage 1) Enabling Works

2019

**Trunk Mains Replacement - Brooker Terrace
\$5,000,000**

Client: APA Group

Brooker Terrace trunk mains replacement

2018

**APA Gas Mains Replacement Program
\$25,000,000**

Client: APA Group

Gas works for the APA Group totalling \$25m

2017

Bowden Redevelopment

\$4,000,000

Client: APA Group

Gas works for the Bowden Redevelopment project

2018

Transmission Pipeline Murray Bridge

\$1,500,000

Client: APA Group

Gas works transmission pipeline in Murray Bridge
