Barpa Construction Services is an Indigenous commercial construction company certified by Supply Nation.

Barpa provides an Indigenous Construction Solution with the experience, resources and financial capacity to deliver both simple and complex construction projects in every Australian state and territory with offices located in Darwin, Melbourne, Geelong, Brisbane, Townsville, Sydney, Perth and Canberra.

### Summary

Barpa has a strong record in delivering projects on-time, on-cost and at a high quality. Barpa holds all relevant insurances, safety accreditations and building licences, and our management systems facilitate successful construction projects consistently. Our systems are best practice, extensive, robust and where applicable are accredited to Australian and International management standards.

Barpa offers an Indigenous solution for capital works projects across Australia and is an active participant in

Federal, State and corporate capital procurement programs aimed at Closing the Gap for Indigenous Australians.

As a majority Indigenous owned business, Barpa is making a positive difference for Australia's First People. We pride ourselves on respectful Indigenous engagement, dedicated training and employment opportunities for Indigenous people, supporting the Indigenous business sector and paying dividends to our community of Indigenous owners.

### Description

Barpa has developed a reputation for the successful delivery of technically complex projects, and our people are renowned for their achievements in sectors including Defence, Health, Education, Telecommunications, Security, Research & Development, and Infrastructure.

Barpa directly employs 35 staff with access to over 750 Icon staff across Australia, our people are highly mobile which means we can assemble the right project team with the appropriate skills for every project.

The core of our business is the construction of technical and complex facilities that incorporate innovative design and are often constructed within operating environments. We provide the complete spectrum of project services, from concept through completion to maintenance and renewal.

Our success is based on a collaborative approach that builds on our values of RESPECT to ensure the best project outcomes.

Since its inception in 2014, Barpa, which means 'to build' in the language of the Dja Dja Wurrung people, has grown to be one of the most successful Indigenous businesses in Australia with over 50 projects completed and underway nationwide. These projects have been delivered to Government and corporate clients in regional, remote and urban environments.

Indigenous employment has been a high priority at Barpa and our success has enabled us to grow and develop our skilled Indigenous workforce, we are proud to have an Indigenous employment rate

of 60%.

Barpa's approach also emphasises the requirement to provide opportunities to Indigenous owned businesses, and those employing Indigenous personnel.

Barpa's highly skilled staff have extensive experience in delivering projects and will ensure the success of challenging construction projects, specialising in special purpose facilities or highly serviced buildings, commercial

construction projects and facility fit-outs, miscellaneous construction and repairs, projects in operational and secure environments, regional and remote project work, national and multi-site projects.

Our capability and experience enable us to engage in various contracting models including Collaborative Contracting, Early Contractor Involvement, Project Management, Construction Management and Design and Construct

## Previous Significant Projects

2019

**Defence Science and Technology Underwater Test Facility (UTF).**  
**\$10,000,000**

**Client: Department of Defence**

The project consisted of the design and construction of a series of operational and support facilities, amenities and storage, a platform/pier, a boat ramp and an all-weather access road.

The total project took 18 months to complete and was undertaken as an Integrated Head Contract.

Barpa was able to engage several Indigenous Suppliers and Sub-Contractors on the project.

2017

**RAAF Learmonth - Install New Combined Mess**  
**\$7,000,000**

**Client: Department of Defence**

Construction of New Combined mess at RAAF Learmonth

2019

**Facilities to support GIS Capability**  
**\$10,000,000**

**Client: Department of Defence**

The project scope consisted of the design, documentation and construction of facilities and infrastructure to support Geospatial Capability across multiple States and Territories.

2017

**ANSTO Waste Management Services Building**  
**\$4,500,000**

**Client: Australian national nuclear research and development organisation**

Extension to ANSTO Waste Management Services Building
