

CHEVRON AUSTRALIA DRILLING & COMPLETIONS

TITLE: Electric Submersible Pumps (ESP) & Services (U-39248)

DESCRIPTION: Chevron Australia is seeking expressions of interest from service providers capable of supplying ESPs and associated services to support the Gorgon CO2 Injection Project and Barrow Island WA Oil Asset.

The Scope of Services includes the supply of electric submersible pumps and associated downhole equipment including pump monitoring, surface power supply equipment, engineering/installation services, and long-term performance monitoring and optimisation support.

Interested service providers should have the capability to supply ESP equipment for the following well parameters:

	Gorgon CO2 Pressure Management Wells	WA Oil Asset Water Supply Wells
Well Type	Production Well – high rate water wells with some dissolved gas	Production Water Source Well - high rate water wells with some dissolved gas
Number of wells	4	2
Design Production Rate (normal)	15,000 bbl/day	21,000 bbl/day
Design Production Rate rate (max)	20,000 bbl/day	27,000 bbl/day
Motor rating	500 – 600 HP motor suitable for well conditions	400 – 500 HP motor suitable for well conditions

This is potentially a long-term agreement for 10 years with performance incentivisation opportunities.

CONTACT: Industry Capability Network of Western Australia – www.icnwa.org.au/ContactUs.asp

Please Note:

This is a request for specific expressions of interest. Vendors and contractors will be considered for prequalification and / or tender if suitably qualified against this package.
