

Tanami Expansion 2 (TE 2) Project - EXPRESSION OF INTEREST (EOI)

Project Overview:

The Newmont Goldcorp Tanami Operation (NGT) is located in the Tanami Desert of the Northern Territory approximately 530 km north west of Alice Springs. The Brownfields mining operations are located at the Dead Bullock Soak (DBS) area approximately 42 km to the west of the Granites. The nearest settlement is Yuendumu some 250 km southeast of The Granites. The Tanami Expansion 2 (TE 2) Project consists of expanding the mining infrastructure at Newmont Goldcorp Tanami Operations and potential increase of current ore production rate from its current nominal 2.6 Mtpa.

Package Title:

TE2 Process Plant Upgrade Construction (SMP)

Package Description:

The Contractor's Scope of Work is for the procurement, construction, and commissioning support necessary to implement the planned upgrades at the Granites processing facility. Briefly, this work includes:

- a) Supply and installation of 2x new cyclones to an existing secondary cyclone cluster (including pneumatic isolation valves, feed and overflow pipe spools)
- b) Supply and retrofit a new motor and pulley arrangement to 2x existing secondary cyclone feed pumps
- c) Demolition of DN450 primary cyclone feed piping
- d) Supply and installation of DN350 primary cyclone feed piping
- e) Installation of a new particle size analyser (including appurtenances) (free-issued)
- f) Supply and installation of a new primary gravity tailing return pump
- g) Addition of a nozzle to an existing feed hopper
- h) Supply and installation of bypass piping
- i) Supply and installation of a trash screen oversize chute
- j) Supply and installation of a trash screen oversize launder (including pipe supports)
- Supply and retrofit a new motor and pulley arrangement to 2x existing pre-leach thickener feed pumps
- Supply and retrofit a new motor and pulley arrangement to 2x existing pre-leach thickener underflow pumps
- m) Supply and installation of a new air compressor unit
- n) Supply and install an extension to a structure to support and shade the air compressor
- o) Demolition of existing tailings piping
- p) Supply and installation of new tailings piping

The work shall include, but shall not necessarily be limited to, the following:

- a) Supply of all off-site and on-site labour, materials and equipment, necessary to complete the works in accordance with all Specifications and Drawings;
- The Contractor is responsible for all things necessary or incidental to the performance of the Services and address the associated risks with a safe system of work;
- The Contractor as a minimum is to demonstrate compliance to NT Acts and Regulations, WA Acts and Regulations and Australian Standards.

Key Information to be included in the EOI:

Proposals which include opportunities for local NT and indigenous employment and/or $\,$

business participation will be reviewed favourably.

Must provide resourcing information specific for the contract package.

Evidence to be supported with key past client reference people and their contact details

Must be able to demonstrate how to meet cultural heritage commitments and provide

evidence from other projects.

Must provide details of a Quality Management system and records of previous

performance.

Key Milestones: Tenderers Release Date: 18.02.2021

Target Contract Award Date: 05.04.2021

Completion: 30.07.2021

Expression of Interest: Contractors are invited to express an interest in this package by registering on the ICN

Gateway on line platform. Please ensure your ICN company profile is up to date before

registering your expression of interest.
