YOKOGAWA AUSTRALIA PTY LIMITED

Highly regarded in the global marketplace as a quality focused, pioneer in the development of process automation, safety, data management and instrumentation solutions, Yokogawa play an important role in helping our clients meet and exceed corporate KPI's. As an organisation, our goal is to contribute to society through broad-ranging activities, while individually, we aim to combine good citizenship with the courage to innovate. We are conscious of our role in supporting our people, our customers people and their communities. Through working with institutes, associations, and educational institutions, we not only support them in keeping abreast of the latest technologies, but also provide opportunities to enter the field of process control, safety and instrumentation.

We are recognised for our ability to meet the most demanding of schedules, often on applications that test the limits of conventional platforms and expertise.

Summary

Yokogawa in Australia is a leading supplier of industrial automation, instrumentation and process improvement solutions. Yokogawa offers a total enterprise information system from the factory floor to the boardroom, enabling real time operations management.

To ensure that it offers optimum, realistic solutions Yokogawa integrates its solutions with existing client technology and requirements. Yokogawa offers full backward compatibility and allows its customers to migrate their systems in a flexible and economical manner.

Yokogawa is the long time leader in Distributed Control Systems [DCS] solutions as well as the supplier of quality Process Safety, SCADA, PLC's, Process instrumentation and Digital Enterprise Solutions.

Yokogawa provides not only products but also consulting, systems configuration, preventative and breakdown service and training.

With sales & service branches in 7 locations in Australia, Yokogawa is well positioned to meet the needs of its customers.

Description

Highly regarded in the global marketplace as a quality focused, pioneer in the development of process automation, safety, data management and instrumentation solutions, Yokogawa play an important role in helping our clients meet and exceed corporate KPI's. As an organisation, our goal is to contribute to society through broad-ranging activities, while individually, we aim to combine good citizenship with the courage to innovate. We are conscious of our role in supporting our people, our customers people and their communities. Through working with institutes, associations, and educational institutions, we not only support them in keeping abreast of the latest technologies, but also provide opportunities to enter the field of process control, safety and instrumentation.

We are recognised for our ability to meet the most demanding of schedules, often on applications that test the limits of conventional platforms and expertise. This is only possible due to the depth and range of our engineering skills and through working closely with our customers. With warehouse facilities in Sydney and Christchurch, we also stock a range of fast moving and specialist products which are critical to the ongoing process availability of our customers.

Our Digital Enterprise Solutions Group provides consultancy services, software, edge, artificial intelligence, and cloud-based analytic solutions. We identify root cause of customer site issues

and/or potential process improvement, recommend a mutually beneficial method of implementation, then deliver a cost-effective resolution.

We take pride in the quality and capabilities of our employees, with over 2000 years of accumulated service within the regional organisation and an emphasis on personal development. Not only do we retain the best minds within the organisation, we also develop next generation and graduate engineers. This ensures we combine the best aspects of new and emerging technologies and thought processes with experience gained over many decades of working within the process industries. Underpinning this are a group of highly qualified and experienced Subject Matter Experts (SME's), who provide an advanced level of understanding on a range of critical technology and implementation topics. This is further enhanced through the continuous development of our engineers through the 'Yokogawa Certified Engineer' programme, ensuring skills always remain current.

We believe our approach extends the quality and reliability aspects beyond our product portfolio to its people, ensuring a complete customer service experience and a technological solution which exceeds expectations without the hype.

YOKOGAWA AUSTRALIA PTY LIMITED

Industries Served

- Automotive
- Clean Energy
- Construction & Engineering
- Defence
- IT & Communications
- Manufacturing
- Mining
- Oil, Gas & Energy
- Professional Services
- Rail
- Transport
- Water

Facilities & Equipment

- Configuration Rooms
- Distributed Control Systems
- Engineering
- FAT Area
- Process Instrumentation
- Process Analysers
- Safety Integrated Systems
- Training
- Remote Commissioning & Support

Products & Services

- Automation systems
- Safety Instrumented Systems
- SCADA systems
- Process control systems
- Distributed control systems (DCS)
- Industrial control systems design and implementation
- Controllers
- Gas & liquid analyzers
- Instrumentation
- Programmable logic controllers (PLC)
- Remote terminal units (RTU)
- Process analyser systems.
- Process control system repairs
- Process instrumentation repairs
- Process control system site audits
- Automation applications software design
- Management information services
- Factory acceptance test procedures
- Automation and process control systems training
- Advanced Process Control
- Asset Management

YOKOGAWA AUSTRALIA PTY LIMITED

Previous Significant Projects

Client: INPEX

Project: Ichthys Venturer FPSO

Year: 2018

Value: \$100,000,000

Description: Provided Integrated Control and Safety System (ICSS) and provided Main Automation Contractor (MAC) services, long-term Support Contract signed 2017

Client: Origin & Conoco

Project: APLNG

Year: 2014

Value: \$100,000,000

Description: Supply of instrumentation, Process Control and Engineering

YOKOGAWA AUSTRALIA PTY LIMITED

Client: AGL

Project: Loy Lang refurbishment

Year: 2014

Value: \$100,000,000

Description: Supply of instrumentation, Process Control and Engineering including updating gas detection with connectivity back through the SCADA system

Client: INPEX

Project: ICHTHYS

Year: 2013

Value: \$100,000,000

Description: Supply of instrumentation, Process Control and Engineering

YOKOGAWA AUSTRALIA PTY LIMITED

Client: CSBP Westfarmers

Project: NAAAN#3 plant

Year: 2012

Value: \$100,000,000

Description: Supply of Process Controls systems and Instrumentation, engineering

Client: Chevron

Project: WHEATSTONE

Year: 2012

Value: \$100,000,000

Description: Supply of all instrumentation, Process Control and Engineering

YOKOGAWA AUSTRALIA PTY LIMITED

Client: Newmont

Project: BODDINGTON GOLD MINE

Year: 2010

Value: \$100,000,000

Description: Supply of Process Control, Instrumentation and engineering

Client: Apache, Quadrant Energy

Project: Ningaloo Vision FPSO

Year: 2010

Value: \$2,500,000

Description: Provided ICSS and instrumentation package for the Ningaloo Vision and long-term support contract in place.

YOKOGAWA AUSTRALIA PTY LIMITED

Client: MODEC

Project: Pyrenees Venture-FPSO

Year: 2010

Value: \$2,000,000

Description: Provided the full ICSS for the FPSO, and maintains support for the project since the vessel was commissioned.

Client: Chevron

Project: GORGON

Year: 2009

Value: \$100,000,000

Description: Supply of all instrumentation, Process Control and Engineering
