

BLAST AND PAINT SERVICES ASC Sites

ASC is seeking expressions of interest (EOI) from suitable and experienced companies to provide blast and paint services to support Collins Class Submarine Maintenance at ASC South, Osborne SA and ASC West, Henderson WA. Work will be performed at times in confined spaces. There will be a requirement for a portion of the workforce to hold Australian Government Security clearance levels, Baseline and Negative Vetting Level 1 for selected tasks. The general description of services required include;

1. paint removal;
2. surface preparation;
3. paint application;
4. care and protection set up after painting;
5. cleaning, sillage and Blast and Paint residue waste disposal;
6. management of dehumidification control of tanks and spaces including ventilation and extraction;
7. scaffolding and encapsulation;
8. paint and consumables procurement, and management of paint storage; and
9. quality inspections.

Companies are requested to provide a capability statement in response to this EOI, including technical capability, recent relevant experience and any other information it deems relevant. Companies may express their interest to provide services at one or more operational sites.
