Breight Group operates with its head office in Perth and is supported by offices in Port Hedland, Karratha, Newman, Boddington and Onslow.

Summary

Breight Group offers Access, Mechanical and Renewables services to the Resources Industry, providing a fully integrated solution. We deliver

efficiencies, lower costs and accelerated schedules without compromising safety.

Description

Breight Group operates with its head office in Perth and is supported by offices in Port Hedland, Karratha, Newman, Boddington and Onslow. Employing 500+ employees, Breight has an annual turnover in excess of \$75 million.

We provide job ready trades persons that are committed to Breight Groups high safety and work ethic standards. We specialise in providing solutions.

Breight Group's model is based on our extensive field experience and procedural-based practices. We provide comprehensive services built around educated work processes that use lean principles and key routine activities.

Our capability includes, all access works encompassing form work, structural and mechanical activities. Breight Group's skilled teams have an in-depth understanding of what is required to work in the mining and resource sector. We have developed expert knowledge together with a well established network of

suppliers to support our operations

All employees are engaged direct as we do not use Labour Hire.

Breight Group's ability to effectively manage safety, quality and performance is exemplary. Our systems and procedures have been recognised for their quality and compliance to National codes and third party accreditations

We Support a wide range of projects including but not limited:

- Construction
- Maintenance
- Industrial

Facilities & Equipment

- Breight Group Mechanical helps reduce the total cost of work through a procedural approach to service delivery. Work packages guide all key Mechanical activities to consistently provide high execution efficiency. Our industry experts continuously improve the work packages, train the team and monitor the quality of their work during on site engagements. Breight Group Access relies on two factors to provide best in class shutdown solutions: 1) Access engineers who design and optimise access solutions - Scaffold and Rope Access 2) Highly skilled access technicians that have gained best practice skills in the BG Education training centre Breight Group Renewables is leveraging a collaboration with European partners to provide certified technicians for wind turbine service, maintenance and inspection and solar farm installation. Breight Group Education helps to continuously improve the execution performance through a combination of training courses offered at our own HiSkill RTO facility. We develop best practice work packs designed and managed by our Resource Maintenance Centre of Excellence (RMCoE). The innovative practices of our divisions are supported by OEM's and a rigorous set of processes and standards that ensure all the fundamental characteristics the clients have come to expect from high performing business.

Previous Significant Projects

Client: BHP

Project: BHP Maintenance and Shutdown Services

Year: 2018

Value: \$60,000,000

Description: Full supply of scaffold and rope access trade services for maintenance and shutdowns across all mines and port operations.
