

## Tanami Expansion 2 (TE 2) Project - EXPRESSION OF INTEREST (EOI)

**Project Overview:** The Newmont Tanami Operation (NTO) is located in the Tanami Desert of the Northern

Territory approximately 530 km north west of Alice Springs. The Brownfields mining operations are located at the Dead Bullock Soak (DBS) area approximately 42 km to the west of the Granites. The nearest settlement is Yuendumu some 250 km southeast of The Granites. The Tanami Expansion 2 (TE 2) Project consists of expanding the mining infrastructure at Newmont Goldcorp Tanami Operations and potential increase of current

ore production rate from its current nominal 2.6 Mtpa.

Package Title: General Surface Civil and SMP Works

Reference: C4082

Package Description: The TE2 project scope includes the installation of Surface Non-Process Infrastructure at

the DBS mineral lease site. This infrastructure consists of various design and construct contract awarded facilities as well as some supply only packages and general surface

works that require a civil and SMP construction contractor to construct or install.

General surface works include bulk earthworks and finishing earthworks such as excavation and creation of dirty water settling ponds, installation of service water treatment and distribution pumps, tanks and other mechanical equipment, utility corridors trenching, pipe installation and backfill, utility corridor road crossings, road finishing works, switchroom and other facility foundations and other general SMP installation works such as for LV wash bay facility installation, bus stops and light poles and above ground pipe racks.

Rock is present across much of the site and as such excavation works will require a mixture of ripping, rock breaking and potentially blasting as well as excavation and hand digging.

Whilst some materials and packages will be considered "free Issued" to the contractor including some specialised pipework and all major mechanic equipment such as pumps, tanks and packaged units, other materials including some HDPE and steel pipework and fittings, valves, steelwork for pipe racks and general construction materials such as reinforcing bar will need to be purchased and delivered to site as part of the works.

Contractors are to supply all labour, equipment and consumables to facilitate the works.

In accordance with Newmont's commitments to building local and Indigenous capacity in the region, the tender evaluation will include a weighting for utilising local regional businesses in the Northern Territory.

Newmont reserve the right to combine this package and or parts of this package with any other project package.

Key Information to be included in the EOI:

Must provide a draft Indigenous Relations Management Plan.

Must provide resourcing information specific for the contract package.

Must be able to demonstrate how to meet construction environmental commitments and provide evidence from other projects. Evidence to be supported with key past client

reference people and their contact details

Must provide details of a Safety Management system and records of previous safety

performance such as LTIFR and RIFR.

Must provide details of a Quality Management system and records of previous

performance.

Key Milestones:

Tenderers Release Date: 07.10.2021

Target Contract Award Date: 31.01.2022

Completion: TBA

**Expression of Interest:** 

Contractors are invited to express an interest in this package by registering on the ICN  $\,$ 

Gateway online platform. Please ensure your ICN company profile is up to date before

registering your expression of interest.

**EOI Closing Date:** 

05.08.2021
