

CHEVRON AUSTRALIA OPERATIONS

TITLE: Mercury Waste Handling and Processing (ID1435)

DESCRIPTION: Chevron Australia is seeking expressions of interest from suppliers capable of supporting all or part of the processing, stabilization and disposal of mercury impacted hazardous waste.

The requirement for the Services cover Chevron Australia's operating assets and may include but not be limited to the storage, handling and disposition of the following waste streams:

- Liquid/ Sludge;
- Elemental Mercury;
- Catalyst;
- Filters; and
- Contaminated metals/valves

Service Providers shall provide:

- Company profile;
- Company experience in providing similar services;
- Current licensing capacity;
- Capability for each waste stream against each of;
 - Treatment,
 - Stabilisation, and
 - Disposition.
- Proposed method of work for meeting the specified waste stream items above.
