### Instructions to suppliers:

If your business has the capability and capacity required to deliver the stated scope of work, please express your interest via the ICN Gateway at <https://inlandrailt2a.icn.org.au>.

Please ensure that:

- Your company profile on [ICN Gateway](#) is fully complete, up to date and accurate; and
- You respond to all project-specific questions during the EOI process; and
- You register your interest as a Full Scope or Partial Scope (where applicable) supplier through [ICN Gateway](#).

Should you have any questions in relation to this opportunity or the expression of interest process in general, please contact:

**Mr Grant Jennings**  
**Industry Adviser, Industry Capability Network (ICN) Victoria**  
**M: 0438 411 129**  
**E: [gjennings@icnvic.org.au](mailto:gjennings@icnvic.org.au)**

### Disclaimer:

Scope of Work is indicative only and is intended to be used as a summary description of work which may be required by McConnell Dowell. This information may be subject to change. Full scopes of work will be made available to parties that are invited to tender or to whom a request for information issued. There is no undertaking to contract or proceed to a competitive process implied by this form. McConnell Dowell may or may not contact interested suppliers at the company's discretion.

# SUSTAINABILITY IN PROCUREMENT

McConnell Dowell is delivering various road and rail upgrade projects for Australian Rail Track Corporation (ARTC) as part of the Inland Rail project. We are committed to achieving sustainable procurement outcomes in line with the Inland Rail Sustainability Policy and Sustainable Procurement Policy. Project objectives and targets across environmental, social and economic aspects will be considered in the procurement processes. A significant criterion in the selection process shall be subcontractors' commitment to these objectives and targets.

## REDUCTIONS ENERGY FROM FUEL, MATERIALS AND WATER

### Reduced use of energy and water

- 15% reduction in energy from diesel and electricity use
- ✓ Use of biodiesel in generators
- ✓ Efficient plant and equipment
- ✓ Solar based equipment during construction
- 30% reduction in total water use
- Utilising non-potable water whenever feasible

### Reduced carbon from materials

- 10% reduction in energy embodied in the materials use
- ✓ Use of recycled materials
- ✓ Recycled content such as supplementary cementitious material in concrete
- ✓ Use of less materials
- 15% reduction in total materials used for the project

### Reduced waste to landfill

- 90% of waste is diverted from landfill
- ✓ Site won redundant Materials separated for reuse
- ✓ Use of materials sourced from redundant infrastructure maximised
- ✓ Segregation of waste to maximise quality for future reuse or recycling

## INDEPENDENT REVIEW OF SUSTAINABILITY PERFORMANCE

### Infrastructure Sustainability Council of Australia (ISC)

- ✓ Infrastructure Sustainability is the rating tool developed by the ISC.
- ✓ It provides guidance on best practice for sustainability in infrastructure (other than buildings) such as the civil, signaling and road works.

### Significant elements will be targeted from the rating tool such as:

- ✓ Ecological protection and enhancement
- ✓ All subsoil and topsoil impacted by the project is separated and protected from degradation, erosion or mixing with fill or waste

## REPORTING

- Subcontractors must submit monthly progress reports on National Greenhouse and Energy Reporting (NGERS)
- These reports are to include energy, water, waste and materials
- Subcontractors must keep and/or provide auditable evidence to
