

## HYDROGEN PRODUCTION

### Recycling and Circular Economy

The South Australian Hydrogen Supply Chain study will be broken down into key products and services, which will be included in an SA Hydrogen Supply Chain Capability Directory.

The following list is an indication of key goods and services required for the building of **Recycling and Circular Economy**. The list is not exhaustive, and if you supply any items that are not listed, please provide a description through your expression of interest.

- Reclaim PVs
- Transmission including towers
- Wind turbine blade recycling
- Fuel cell tanks etc
- Batteries
- Wastewater (including brine management)
