

Project Overview: IB Operations Pty Ltd (IB Operations), as agent for the joint venture between FMG Magnetite Pty Ltd and Formosa Steel IB Pty Ltd, is developing a new magnetite Project). The Iron Bridge site comprises the North Star, Eastern Limb, Glacier Valley and West Star magnetite iron ore deposits located in the Pilbara region of Western Australia. The Iron Bridge Magnetite Project will include the execution of a process plant, non-process infrastructure, a slurry and return water pipelines, a raw water pipeline and port infrastructure to support 22 wmtpa production. To support FMG's Decarbonisation Startegy and achieve net-zero emissions, there is a requirement for the electrification of mining equipment and other assets across all operations (Decarbonisation Electrical Infrastructure Project). Overhead lines, transformers, switchgear, ring main units (RMU), and associated electrical services are required to expand FMG's electrical distribution network across brownfield operations. Projects will be packaged into programs of work, dependent on-site requirements. Package Description: At the time of publishing this invitation to register an interest, the Supply includes the following: • Supply, manufacture, preservation and packing for sea and road transport of all high voltage (HV) electrical cables • Conductor sizes: Ranging 70mm' to 240mm' • Conductor sizes: Ranging 70mm to 240mm' • Conductor sizes: Ranging 70mm to 240mm' • Conductor sizes: Ranging 70mm to 240mm to the form capable and experienced and drum and marked with a unique identifier to allow installation <th></th> <th></th>

EQL Registrants are required to provide the following information as part of its EQL		Interested parties must register an EOI on the ICN Gateway, ironhridge icn org au
EOI Registrants are required to provide the following information as part of its EOI.		interested parties must register an LOI on the few Gateway in on bridge.ich.org.ad

	(a) an ICN Gateway company profile, current in all material respects; and
	(b) completed Preliminary Prequalification Information.
	IB Operations will use the EOIs to improve its understanding of market capability and interest. Suitable EOI Registrants may be invited to submit a tender for this package FF24OP002G .
EOI Closing Date:	17 April 2023
Target Award Date:	At the time of publishing this invitation to register an EOI, July 2023
Project Contact Officer:	All communications, clarifications, or requests for technical support in connection with this invitation to register an EOI for this package FF24OP002G or ICN Gateway, must be submitted to:
	Andie Pfaff, Project Officer
	Industry Capability Network of Western Australia
	T: (08) 9365 7442
	E: andie.pfaff@icnwa.org.au
Project URL's:	Details of additional Iron Bridge Magnetite Project opportunities will be published on the ICN Gateway at ironbridge.icn.org.au
Disclaimer:	The information contained in this invitation to register an EOI is indicative only and subject to change at IB Operations' discretion. It is intended to provide a brief outline of the relevant Supply which may be required on the Iron Bridge Magnetite Project and should be read in conjunction with the Iron Bridge Magnetite Project Description on the ICN Gateway.
