

PLUTO LNG TRAIN 2

(C187)

Relocation of Existing Rock Stockpiles and Rough Grading

SITE LOCATION

The Site B East Jobsite is a part of the Pluto LNG Park located on the Burrup Peninsula in the West Pilbara region of North Western Australia, approximately 13KM by road northeast of the town of Dampier.

2.0 SCOPE OF WORK

The scope of work is to provide the supervision, equipment, and labour to relocate existing rock stockpiles (approximately 60,000 cubic metres), and to perform the early sitework and rough grading pad for a future warehouse facility and chemical storage area. The scope of work will include general excavation, backfilling, the relocation of materials from an existing rock piles to a new stockpile, provision of temporary drains and earth mounds, with all works specified to conform with environmental regulations.

It is anticipated that works would be required to commence June 2023.
