## Description

RMC Rail Services is a division of Railtrain that provides a wide range of services Nationally in civil, track, signalling & track protection. With established depots in Western Australia, Central & Southeast Queensland & Newcastle we deliver high quality services to key clients in the resource & Infrastructure sectors in both passenger & freight networks.

We have extensive expertise in the delivery of complex & logistically challenging rail projects in the mining, freight, & passenger rail sectors.

### FULL TURNKEY PROJECT DEVELOPMENT & DELIVERY

We have strategic partnerships in: design, survey, civil construction, flashbutt welding & signalling disciplines.

RMC Rail Services is capable of supporting full turnkey project development & delivery for small to medium sized projects. We are backed by our inhouse registered training organisation & a strong understanding of above rail operations & functionality, regulatory requirements & delivery capability.

### RMC SIGNALLING & ELECTRICAL

RMC Rail Services acquired Signalling & Electrical capability in 2018 through the purchase & restructure of existing Perth based, Australian Railway Signalling & Electrical. Since 2018, we have moved to further our capability through the provision of signal support to deliver Maintenance & Renewals Programs as well as stand-alone Projects including supporting various projects on the Metronet program & the rollout of Automatic Train Protection for Perth Transport Authority (PTA). With depots in Western Australia & a strong Project Management Office to support we are able to offer dependable delivery services in both maintenance & renewals, Signalling Maintenance, Track Renewals, Construction &

Installation, Flexible FIFO Crews

### RMC TRACK & CIVIL

Asset management, Inspection & Maintenance of Private Sidings, Yards & Terminals  
RMC Rail Services currently has a number of specialist teams Australia-wide conducting inspections & yard maintenance tasks in yards, terminals & private sidings.

With an understanding of the importance of minimising freight disruption, works are executed quickly with a strong focus on asset integrity & minimising asset down time. Our expertise in working in brownfield urban electrified networks enables us to support large scale government projects being rolled out in metro areas.

### TRACK RENEWALS

RMC Rail Services recognises that certainty in delivery during track closures is essential to ensure minimal disruption to our client's operations. With attention to detail & highly skilled engineering & supervision, RMC Rail Services supply specialist teams to work either stand-alone or support our client's workforces to ensure high quality, on time delivery  
We have extensive experience in rail replacement, turnout refurbishment & replacement, culvert renewals & bridge rollouts.

### SPECIALIST RAIL SERVICES (Stacker / Reclaimer Rail)

As track construction & renewal specialists, RMC has applied the same skills & detailed planning to the execution of rail replacement, repairs & upgrades on stacker / reclaimer rail throughout the Pilbara (WA) & Bowen Basin (Central QLD).

### RMC TRACK PROTECTION

RMC Track Protection is a major provider of Track Protection & Safeworking Support to Rail Network owners in Western Australia including ARC Infrastructure &
