Project Title: Snowy 2.0 – Future Generation Joint Venture

Project Description: Webuild, Clough and Lane trading as Future Generation Joint Venture (Future Gen) is a main contractor of Snowy 2.0 EPC Project. The Project is a pumped hydro project that will increase the generation capacity of the Snowy Mountains Scheme by up to 2,000MW and at full capacity will provide approximately 350,000MW/h of energy storage. The project includes all activities associated with the requirements for the Snowy 2.0 Pumped Hydro-electric Scheme.

Opportunity Title: Future Generation Joint Venture (FGJV) would like to engage a company with proven experience in subaqueous excavation.

Opportunity Description: The vendor is required to state its interest for the for the following scope of subaqueous excavation,

1. Subaqueous excavation of the Tantangara and Talbingo intake approach channel.
2. Provision of technical assistance through the development of the project, from design finalization to execution.
3. Preparation and submission of a Dredge Environmental Management Plan which meets all environmental requirements.
4. Transport and logistics for all equipment and material not supplied by the Contractor including delivery to site, management, onsite transportation, and the unloading of all Subcontractor supplied materials and equipment.
5. Managing the removal and disposal of the rock bolts, drainage system and material deriving from the grout curtain that have been installed in the rock plug in the previous excavation phases.
6. Dredging of all materials to form the approach channels to the FSL (Full Supply Level) (Tantangara reservoir, circa 696,000m3, & Talbingo reservoir circa 132,000m3) quantity to be confirmed within IFC drawings.
7. Pre-treatment via drill and blast where necessary,
8. Loading and handling of spoil material and disposing from source to designated emplacement area on land

Requirements: FGJV requires Vendor:
