

THEVENARD ISLAND RETIREMENT (TVIR)

TITLE: C1193155 – Offshore Jack Up Rig
****Listed at Component of Package level only****

DESCRIPTION: Chevron Australia Pty Ltd (Chevron) has issued a Request for Information (RFI) from contractors who have Jack Up Rigs capable of meeting the scope of work below.

Project Overview

Chevron Australia Pty Ltd (Chevron Australia) (25.71%) as operator and along with its joint venture partners, Chevron (TAPL) Pty Ltd (25.71%), Santos (35.71%) and Exxon Mobil (12.86%) will be retiring the Thevenard Island (TVI) Asset.

Asset includes onshore facilities on TVI and offshore facilities:

- TVI is a nature reserve, located approximately 22km from the Pilbara coast, northwest of Onslow, and 70km southwest of Barrow Island.
- Saladin, Yammaderry, Cowle, Crest, Roller and Skate oilfields in Production Permit areas TL/4, TL/7, L12 and L13 (tied into TVI process facilities via subsea pipelines), and Exploration Permit area TR/4 located on the inner Rowley Shelf off the northwest coast of Australia.

Scope of Work

Commencing work circa April 2016 to April 2017, TVI plug and abandon program offshore Western Australia comprising 22 offshore production wells on 9 monopods / tripods and one exploration well suspended at the mud line in water depths between 6.4 and 16 meters (Lowest Astronomical Tide).

The expected plugging and abandonment duration is 274 days, excluding mobilisation to and demobilisation from the field and any delays for weather. A 13 5/8" BOP stack with a minimum pressure rating of 5,000 psi is required.
