

## CHEVRON AUSTRALIA - OPERATIONS

**TITLE:** MR001 – Application Management Services

**DESCRIPTION:**

Chevron Australia Information Systems (IS) is seeking to increase the use of managed service model in the provision of application management services (AMS), specifically support, maintenance, development, and service management support for business, asset development, and engineering and operations systems.

Application Management Services will be responsible for managing applications throughout their lifecycle. The incumbent will be responsible for all application-related aspects of designing, developing, testing, operating and improving IT services, as well as providing support for the organization's applications once deployed. Application Management is an ongoing activity, as opposed to Application Development which is typically a one-time set of activities to construct applications.

Chevron Australia IS is therefore seeking information from AMS vendors to:

- further understand the full range of AMS service offerings in the market place;
- further understand the experience, capacity and capability of AMS vendors to partner with Chevron Australia IS to achieve its managed service objectives.

Following this market research initiative, a Request for Information (RFI) may be issued to suitably qualified AMS vendors. The RFI would seek more detailed information from which ABU IS may develop a detailed and specific scope of work for tender.

**CONTACT:** Industry Capability Network of Western Australia – [www.icnwa.org.au/ContactUs.asp](http://www.icnwa.org.au/ContactUs.asp)

**Please Note:**

**This is a request for specific expressions of interest. Vendors and contractors will be considered for prequalification and / or tender if suitably qualified against this package.**
